S C THIRD EDITION

Cluster analysis is a data-reduction technique designed to uncover subgroups of observations within a dataset. It allows you to reduce a large number of observations to a much smaller number of clusters or types. A cluster is defined as a group of observations that are more similar to each other than they are to the observations in other groups. This isn't a precise definition, and that fact ...

topic of this chapter. 7.1 Routed events In a classic .NET event, an interested party has to directly subscribe to an event in order to be notified. For non-UI code, this makes a lot of sense. After all, there's no particular way for regular code to know who else might care and what legitimate rules may exist for passing events to other objects.
