LM? SOLUTION You are given that $\angle JKM \cong \angle LKM$, and you know that $\angle JKM \cong \angle LKM$ by the Reflexive Property of Congruence (Theorem 2.1). Because $64^\circ > 61^\circ$, $m\angle JKM > m\angle LKM$. So, two sides of $\triangle JKM$ are congruent to two sides of $\triangle LKM$, and the included angle in
