Fundamentals

The year 2020 is going to be all about graphs, Machine Learning (ML), Artificial Intelligence (AI), and their connections to each other. The world of semantic technology in 2020 is going to be what industry experts predicted would happen in 2019 and graph technologies would finally become mainstream. According to experts, 2020 might well see [...]

Semantic Web Technologies For E

The Semantic Web is an extension of the World Wide Web through standards set by the World Wide Web Consortium (W3C). The goal of the Semantic Web is to make Internet data machine-readable. To enable the encoding of semantics with the data, technologies such as Resource Description Framework (RDF) and Web Ontology Language (OWL) are used. These technologies are used to formally represent metadata.
