Light Will Not Turn Off With Wall Switch | Hunker

Turn it down a bit and the light should go off a bit more often. Reset It – if your sensor light has an on/off switch located somewhere inside, pay close attention to how you turn it on and off. If you flip the switch, by accident or on purpose, and then flip it back again right away, it could automatically get stuck in the auto-on position.

In fact, 90 percent of the energy incandescent lights use is given off as heat and only about 10 percent results in light. Therefore, turning off incandescent light bulbs is going to save more energy than turning off halogen lights or the far more energy-efficient compact fluorescent light and light emitting diode light bulbs.

Why Won't My Motion Sensor Light Turn Off?

When I flip the switch to my kitchen light off, the 2 bulbs remain very dimly lit. So it looks like there's still AC current flowing to power the bulbs just a little bit. FYI, I replaced the incandescents with LEDs so they don't draw too much power and won't get hot to the touch. And am wondering how I can get those lights to turn completely off.

Can I turn off Webcam Light? - HP Support Community - 3604941
