Transparency
Worksheet The Ph
19 Answer Key
Neutral solutions such
as water have a pH of 7.

Acids have a pH of less
than 7. The lower the
pH number of an acid
the stronger the acid is.

So an acid like
hydrochloric acid with a
pH of 1 is a lot stronger
than vinegar with a pH
of 3. Alkalis have a pH
of greater than 7. The
higher the pH number

Access Free Teaching

of an alkali the stronger it is. So an alkali like sodium hydroxide with a pH of 14 is a lot stronger than baking soda with a pH of 9.
