The hardest bit is applying it while away from home on business trips and although Gallop gives a few tips its still tricky finding suitable foods. Be aware that this is a more "strict" diet than some other "GI diets" (eg the GI Bikini diet) and makes some low GI foods red-light items that the others consider OK.

Glycemic Index Diet Plan Review, Foods, and More

The Glycemic Index (GI) chart shows how much and how quickly a carbohydrate-containing food raises your blood-sugar levels. The lower a food is on the GI, the lower the effect on your blood sugar. The standardized Glycemic Index ranges from 0 to 100. Zero-glycemic foods—those without carbohydrates—include items like meats, fish, and oils. Pure sugar has a
