[14] As of February 12, 2013 the massive wiki-database video game website GiantBomb.com converted from Django to Symfony following an acquisition.

### Silex, Symfony, and Security Question : PHP

Symfony has several built-in authentication providers. If your use-case matches one of these exactly, great! But, in most cases - including a login form - we recommend building a Guard Authenticator: a class that allows you to control every part of the authentication process (see the next section). Tip.

### The Silex Book - silex.symfony.com

Listing 2-10 Listing 2-11 Listing 2-12 There is a SwiftmailerServiceProvider included that you can use instead of mail(). The current request is automatically injected by Silex to the Closure thanks to the type hinting. It is an instance of Request3, so you can fetch variables using the request getmethod. Instead of returning a string you are returning an instance of Response4.
