In computer programming, a forward declaration is a declaration of an identifier (denoting an entity such as a type, a variable, a constant, or a function) for which the programmer has not yet given a complete definition.. It is required for a compiler to know certain properties of an identifier (size for memory allocation, data type for type checking, such as type signature of functions), but

Time-To-Live and Expiration Overview. RabbitMQ allows you to set TTL (time to live) for both messages and queues. This can be done using optional queue arguments or policies (the latter option is recommended).. Message TTL can be applied to a single queue, a group of queues or applied on the message-by-message basis.
