Practice 7-7 Transforming Formulas - SharpSchool

Also, tell them that when solving formulas, an answer may contain a radical} Scaffold: For students that are having difficulty, have them solve the formulas on this resource.

(i) Scaffold_solvingformulas) These are simpler and more resemble equations they ' ve seen many times before. 3) Have each group invent a formula to solve.

Transforming formulas worksheet - Algebrator

A literal equation is an equation involving two or more variables. Formulas are special types of literal equations. To transform a literal equation, you solve for one variable in terms of the others. This means that you get the variable you are solving for alone on one side of the equation.
