glides. Repetitive manual work and injuries can lead to scars and adhesions in surrounding soft tissue that restrict the ulnar nerve. The purpose of these glides is to free it up. This video is a demonstration of just the exercises.

Ulnar nerve entrapment:

Causes and symptoms

Ulnar nerve entrapment is classified by location of entrapment. The ulnar nerve passes through several small spaces as it courses through the medial side of the upper extremity, and at these points the nerve is vulnerable to compression or entrapment—a so-called
