Vector Addition and Subtraction - Practice - The Physics ...

Name \_\_\_\_\_ Vector Addition

Worksheet Directions:

Graphically add each pair of vectors shown below in its box, making sure to show the vector addition as well as the resultant with a dotted line and arrowhead. If there is no resultant, write "no R". Example: R

### *Lesson 15: Solving Vector Problems in Two Dimensions*

We can now start to solve problems involving vectors in 2D. We will use all the ideas we've been building up as we've been studying vectors to be able to solve these questions. The majority of questions you will work on will involve two non-collinear (not in a straight line) vectors that will become part of a right-angle triangle.

*Lesson 15: Solving Vector  
Problems in Two Dimensions  
A resultant is the sum of  
the addition of two vectors.  
Since the vectors both have  
magnitude and direction, so  
does the resultant. When  
adding vectors, it is  
important to make a sketch  
of the vectors involved so  
as to visualize the problem.*
